

# BioEarth Bangladesh LTD.

Presents:

## “BioEarth Clean Dhaka Project”

>Press Release<

Brian Raab is the founder and CEO of BioEarth inc. His US team has joined forces with Marfia and Mohammed Jakir (Bangladesh Nationals) to form BioEarth Bangladesh LTD. BioEarth is bringing many solutions to Bangladesh in an effort to improve the deplorable environmental conditions that continue to plague the people of Bangladesh. BioEarth Bangladesh LTD. is prepared to begin their mission, of providing affordable high tech environmental solutions, immediately by initiating **Projects Supporting the Millennium Development Goals: including Power Production, Pollution Remediation, Poverty Reduction thru Education and Employment, Increased Food Harvest with Organic Fertilizers and Improved Sanitation.** BioEarth would like to work with the Federal and local Governments to initiate Public Private Partnerships to resolve the problems the plague Dhaka and all of Bangladesh. Our intention is to outline a project for Dhaka that can be used a template for the entire country. The following issues have been brought to our attention and fall within the scope of services BioEarth inc and BioEarth Bangladesh LTD is prepared to provide.

1. **Recycling Centers: CoGeneration Waste Plants** that will use Pyrolysis to Convert 350 to 700 Tons of Waste Per Day including: MSW, Tires, Plastic, Medical Waste, Polluted Dredge Spoils & MORE > To Produce Electricity, Bio Fuel, Carbon Black and Potable Water. All From the City’s Trash
2. **Commercial Composting Plants**: 600 Tons Per Day of Organic Material Producing Bio Fertilizer, Mulch and High Grade Topsoil to Improve the Farmlands of the country and Produce More Food
3. **Reconfigure Garbage Collection Systems with New Equipment and Training**: Covered Bio Fuel Garbage Collection Trucks, Roll-Off Container Trucks Garbage “In-Water/ On-Shore Trash Collection” Barges and Trash Dumpster Container Barges, Roll Off Containers, Covered Dumpsters & Street Cans, Riverside Dock Sanitation System, Education for the Public and Employees, a modern website and a **Compost Credit Reward Program to Inspire Participation**
4. **Environmental Dredging, Dewatering & Pollution Remediation** for Clean Rivers, Improved Navigability, More Sanitary Water and Tons of usable earth to Re-Claim land or Rebuild Riverbanks. Our Systems Separate the Polluted Silt from the Sand and Water for Sanitation
5. **Solar Powered Arsenic Removal Systems** for rural areas and Water Purification Systems to Treat Effluent from Factories. We can Move this factory to Bangladesh and begin Global Export.
6. **Desalination Vessels** to provide 250,000 to 1 Million Gallons Per Day. We are finalizing the design of our first Bio Powered / BioEarth H2O Vessel that will supply Mobile Infrastructure Support and Bagged Water for off grid supply and Natural Disaster Support throughout the entire region.

BioEarth Bangladesh LTD. Chair Person Marfia Jakir Stated: “BioEarth is prepared to commence operations on ANY or ALL of these Projects the day after financial commitments are in place. We will Deliver needed Supplies and Equipment AS Soon AS Possible and be Operational Within 6 months and in Full Production within a YEAR.” She added, “We intend to provide Training and Employment to Thousands of people, Also assist with Food, Health Clinics, Family Education and Housing for all our faithful employees.” Mrs. Jakir was in Dhaka meeting with associates about Waste Recycling for the proposed World Famous Hi-Tech Park.
